Cumulative Index

NEED to find something published during 1980 in TEXTILE CHEMIST AND COLORIST? This index can help you locate it quickly either by author or by subject matter.

For example, if you know that the article you are looking for was written by COOK, a check of the INDEX OF AUTHORS shows F. L. COOK as a co-author of Title 5. The INDEX OF TITLES, in turn, identifies Title 5 as "Plant Trials on Dyebath Reuse Show Savings in Energy, Water, Dyes and Chemicals," and shows that the article was published 1-15/1 (1=the January issue; 15=the page number in the January issue; and the 1 following the virgule (/)=the continuous pagination for calendar year 1980).

If you don't know who wrote the article, you can locate it by using the KEY TERM INDEX below. You know, for example, that the subject of the article is *dyebath reuse*. Finding that term in the KEY TERM INDEX will give you the title numbers of all articles published thus far this year that pertain to *dyebath reuse*.

A crosscheck between additional key words—*dyeing, energy conservation, water consumption,* etc.—will provide the same title number in the KEY TERM INDEX. A comparison of broader key terms with those that are more specific will reduce the search even further.
